

PROFESSIONAL SUMMARY

Software Engineering student and freelance developer with 5+ years of independent client experience across web, mobile, and AI automation. Delivers full-stack web apps (React, Next.js, Laravel), cross-platform mobile apps (Flutter/Dart, one published on the OPPO App Market), and automation/agent workflows (n8n, Zapier, Make.com, LangChain). Currently building a computer-vision-based multi-camera surveillance system as a Final Year Project. :

EDUCATION

Degree	Institute/Board	Year
BS Software Engineering	FAST-NUCES	2022 – 2026
Intermediate	BISE, Mirpurkhas	2020 – 2022
Matriculation	BISE, Mirpurkhas	2018 – 2020

WORK EXPERIENCE

- FREELANCER

2025 - Present

Web DevelopmentOnline

– Developed and maintained custom websites for clients across diverse industries, delivering projects on schedule.

– Implemented responsive, user-friendly Websites using HTML, CSS, JavaScript, PHP, laravel and React.

– Documented code and project updates, creating comprehensive notes and progress reports for clients.

PROJECTS

- AGENT BASED VISION-MIXER FOR VIDEO BROADCASTS (Final Year Project)

– Built an intelligent multi-camera vehicle surveillance system using YOLOv8 for real-time detection and DeepSORT for single-camera tracking across parallel RTSP streams.

– Implemented cross-camera vehicle re-identification using ResNet-IBN appearance embeddings and cosine similarity, assigning persistent global IDs across the entire camera network.

– Designed a Dynamic Bayesian Network (DBN) scoring engine that automatically switches the active feed to the best-quality camera using hysteresis and frame-buffer stability checks.

– Automated video stitching of multi-camera journey clips via FFmpeg and delivered compiled footage to recipients via SMTP email, with a full desktop GUI for live monitoring.
- HOTEL MANAGEMENT SYSTEM

Github

– Demonstrated Object-Oriented Programming (OOP) principles in C++ with features like room booking, billing, and etc. Focused on modular design, data persistence, and code reusability.
- CONNECT-SPHERE - COMMUNITY ENGAGEMENT APP

– Built using Flask and Tkinter to connect users and enable community interaction with real-time data exchange.

– Integrated Firebase for authentication and secure data storage.
- OTHER PROJECTS

– AI-Driven Matrimonial Platform, PHP web app with Flask API, SQL database, ML matchmaking, and chatbot.

– Pathfinding Algorithm Visualizer, Python tool visualizing BFS, Dijkstra, Bellman-Ford, Floyd-Warshall.

– Multi-Agent Stock Trading System, AI simulation using Naive Bayes, K-Means, and multi-agent framework.

– Weather App, Python app fetching real-time weather via Weather API.

TECHNICAL SKILLS

- Programming Languages: C/C++, Python, Java, SQL, HTML , CSS, JavaScript, PHP

• Software/Tools/libraries/Frameworks: Visual Studio, Git, Ubuntu, FastAPI, Bootstrap, Laravel, WordPress, Jupyter Notebook, Wireshark, IntelliJ IDEA, Cisco Packet Tracer, Anylogic, Jira, Trello, ProjectLibre, Docker & Kubernetes

• Testing Tools: Selenium, Jmeter, SonarQube

• UI/UX Tools: Google Stitch, Figma, Canva

CERTIFICATIONS

- Uwrox - Self Alignment to Startup,Focused on startup alignment program and community services.

02/2023
- CodSoft (Internship) - Programming in C++,Completed an internship covering all advanced c++ concepts.

12/2023
- Microsoft - Front-End Development, Completed a Microsoft-certified course.

01/2024
- Coursera - C# Course Completion, Successfully completed a C# programming course on Coursera.

10/2025
- Google - Gemini Certified Student, Earned certification as a Gemini Certified Student by Google.

10/2025
- CISCO Networking Academy - Data Science Course, Completed the Data Science course.

11/2025
- Aspire Institute - Aspire Leaders Program, A global leadership and professional development program.

04/2026
- Google-Antigravity - Vibe Coding Hackathon , Participation Certificate.

05/2026
